  - 4.3 inch TFT touch screen
  - **Ethernet (TCP/IP) Communication**
  - **USB Flash Drive Download** (flash drive not included)
  - 1 Year Hardware Warranty

## CompuTime101 Professional With Enhanced Shift Rules

Define up to 999 different shifts. Each employee can have a different shift and shifts can be assigned by day (such as shift 1 Monday-Thursday, shift 3 on Friday). Shift rules include the following features:

Revision Zones (3 in and 3 out zones) - Control unauthorized overtime by not calculating time before and after defined shift times. A supervisor can override a revision zone at any time on a case by case basis.

Punch Rounding - Round punches to a quarter hour with flexible break points. You can be as strict or lenient as you want and round in punches different than out punches. In addition, you can specify 2 exempt zones during which time punches are not rounded.

Automatic Lunch Deduction (2 levels) - Automatically deduct lunch based on continuous hours worked with the ability to set a larger deduction for longer shifts.

Paid and Unpaid Break - Qualify breaks based on duration to be paid or unpaid. You can also enforce a minimum deduction for employees that punch out for less time than required.

Overtime Override - Set custom overtime levels for employees that are subject to different levels than the rest of the company. This feature also allows you to apply overtime rates to an entire day, such as all Sunday hours are overtime.

Enhanced Early/Late Tracking - Each shift can have times defined to determine if an employee arrived early, arrived late, left early, or left late. In addition, the enhanced report will flag all early/late punches and provide a count of occurrences for each item.

Daily Hour Budgets - Track expected versus actual hours for each shift to help identify wasted labor hours.

## Employee Capacity

Upgrade to 50, 100, 250, or Unlimited employees.

## Multi-User License

Install the CompuTime101 software on multiple computers and share the data. Setup multiple user names and passwords to track which user made punch corrections. Assign user rights to restrict access to features such as wages or punch editing.

## Code Collection

Collect a user entered code at the terminal. You define the codes, ranging from 1-9 digits (8 digits max with the HandPunch clock). Codes can be used to track departments, jobs, etc... Detail and summary reports are available and can be filtered by code number.

## HandPunch Communication Module

Required to communicate with a Biometric HandPunch time clock.

## Extended Software Support

1 year software support agreement includes unlimited phone and e-mail support.

## Hardware Features:

Dual HD cameras with an infra-red light source captures a 3D facial image map  
Optical fingerprint sensor, 360 degree recognition  
700 face template capacity  
3000 finger template capacity  
Enroll multiple fingers for each employee  
Use with face, fingerprint, or PIN + password  
4.3 inch TFT color touch screen display  
Intuitive menu layout for easy management  
100,000 punch transaction buffer memory  
Constant computer connection NOT required  
Battery backup
